

Website Work and Ideas

A plain-language record of current work, possible improvements, and items that need a decision.

How to read this document

This document records work. It does not approve payment. Each new request must use the Website Request Form.

1. Current website work

Work item	Purpose	Status or payment note
Regular website care	Keep existing pages working. Keep approved information current. Fix small errors when they appear.	Normal responsibility
Content updates	Add or update approved text, images, prices, contact details, and other regular information.	Normal responsibility
New website improvements	Create a new page, section, feature, or customer action that did not exist before.	Additional work unless agreed otherwise

2. Work that improves internal operations

Work item	Purpose	Status or payment note
Request handling	Reduce repeated questions and make work requests easier to record and follow.	Status to be recorded
Information reuse	Organize approved information so staff can find and reuse it more easily.	Status to be recorded
Work guidance	Create clear instructions that help staff complete repeated tasks with fewer mistakes.	Status to be recorded

3. Work that reduces repeated manual effort

Work item	Purpose	Status or payment note
Routine task support	Reduce repeated copying, checking, and preparation work.	Needs review before approval
Information preparation	Prepare information in a consistent form for staff and customers.	Needs review before approval
Review and approval steps	Make it clear when a person must check and approve a result.	Needs review before approval

4. Future ideas

Work item	Purpose	Status or payment note
Better request visibility	Make it easier to see what is waiting, what is active, and what needs a decision.	Idea
Better customer follow-up	Make it easier to remember and complete the next action for each request.	Idea
Clearer information journeys	Help people find the right information with fewer steps.	Idea

5. Work waiting for approval

Work item	Purpose	Status or payment note
New work request	Record the desired result, scope, completion check, owner, value, and payment category before work starts.	Waiting for approval
Change to approved work	Record any change to the result, scope, value, stages, or acceptance check.	Waiting for approval

6. Record for every work item

Every item should record:

- Plain-language name
- Purpose
- Current status
- Expected benefit
- Remaining work
- Information needed
- Decision needed
- Normal responsibility or additional work
- Person responsible
- Next review point

7. Status choices

Idea · Under review · Approved · In progress · Waiting for information · Waiting for approval · Complete · Paused · Cancelled

8. Payment note

This record does not set a payment amount. Additional work receives its value through the Website Request Form. The approved record must contain the base value, impact category, impact percentage, total recorded value, payment trigger, and acceptance person.

9. Information still needed

The responsible people must still agree the impact percentages, the person who confirms that the financial crisis ended, the review date if payment remains delayed, and the currency for each request.

Prepared for internal discussion. This document contains no customer personal information.
